

PostgreSQL Load Test Results Report

This report presents the performance metrics of our digital twin application using PostgreSQL as the database backend. The test executed 100 sequential requests to /ping from inside the API container to measure baseline latency and connectivity.

General Metrics

Metric	Value
Test Duration (s)	1.24
Total Requests	100
Requests per Second	80.65
Success Rate (%)	100

Response Time Metrics

Metric	Value (ms)
Average	12.41
Median	10.54
Min	6.03
Max	81.32
Std Dev	8.58

Endpoint Details

Endpoint	Total Requests	Success Rate (%)	Avg (ms)	Failures
/ping	100	100	12.41	0
